

# Math & Science News

October 2011

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

5Witts Field Trip Oct 20, 2011

## Math

- 4<sup>th</sup> Graders have just completed the 2<sup>nd</sup> math chapter on multiples and factors. Chapter three will expand on that knowledge. We will learn how to multiply and divide with one digit and two digit numbers. That's right, the times tables just won't go away. Not for a while anyway. Continue to practice math facts. It can only help. Also expect to see more word problems in the near future. Inshallah.
- 5<sup>th</sup> Graders are moving full speed ahead with order of operations. Inshallah we will finish this lesson up with word problems and jump right into fractions! Yippee!

## Science

- 4<sup>th</sup> Graders are beginning chapter two, life cycles. We will explore plant and animal life cycles which will lead us right into the water cycle. Please encourage your child to preview the lesson beforehand. Inshallah, they will come to class prepared to have deep discussions.
- 5<sup>th</sup> Graders are still working on biology. Chapter three will introduce ecosystems and habitats. Again, It is always a good idea to preview the lesson before we read in class.

## Important Dates and Reminders

- Oct 10- Progress Reports
- Oct 14 & 28- 2:30 Dismissal
- Nov 3- Mini-Hajj
- Nov 7-9-Eid Vacation
- Nov 13-End of Term 1

We are happy to announce that 4<sup>th</sup> and 5<sup>th</sup> grade now have two room parents. Sister Selma & Sister Katia, thank you so much!
